Office Action Summary	Application No. 10/816,669	Applicant(s) FALLAK ET AL.	
	Examiner David M. Fenstermacher	Art Unit 3682	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The IDS's, filed 4/11/06 and 7/2/04, have been considered in full.

Drawings

3. The drawings, as originally filed, are acceptable as formal.

Claim Objections

4. Claim 8 is objected to because of the following informalities: The reference numbers should all be deleted (last line of claim 9). Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7, last lines "but that does not transmit any occurring oblique forces" is indefinite because it is not clear what this recitation requires. In other words, what is it that does not transmit the forces.

Throughout the claim the use of the alternative is indefinite. For example, claim 1, "wherein the toothed element is coupled with the rotor unit, or the rotor unit is at least partially formed as a toothed element" is indefinite. It is not clear how the toothed element could be coupled with the rotor unit if the rotor unit were not also toothed. Review the claims in their entirety.

Claim 2, "the system" lacks antecedent basis.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 04254278 (cited by Applicant).

JP 04254278 shows the claimed subject matter where a throttle sensing device has a grip mounting unit (12) rotatably supported on a handlebar (7), a drive pulley and gear member (13, 14) engaged with detecting gear (21) whereby, rotation of the throttle causes the cable to roll upon (13) and the gear mesh between (14) and (21) causes the detecting member (21) to output an electronic signal which indicates the position of the

throttle opening. Note that the use of "may be" in the claims is rather broad and anything that might happen in the future could anticipate the claim. This language is not claiming what is happening, rather what might happen.

Allowable Subject Matter

9. Claims 23-26 are allowed.

Conclusion

10. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
